Analytical Balance TRAB-601

Analytical Balance TRAB-601is a fully automatic, internal calibration device with a completely transparent glass windshield. It has a huge backlit LCD, which improves the operator's visibility. It can weigh up to 110 g and has a minimum reading of 0.001 g. It is a faster and much more reliable device.

Features:

It has humanized design, novel structure, and 5 fully transparent glass windshield surfaces
With the piece, unit conversion, full-range peel, zero tracking, and other features such as multi-functionality, simple and dependable operation
Includes an RS232C output interface that can be directly connected to a computer, printer, another device
It employs a double CAM experiment with a fully automatic internal calibration function, which increases its stability and speed
The Balance includes applications such as preheating, calibration, screen saver, and others
The large backlit LCD screen improves the operator's vision by making it more soft and clear

Specifications :

Linear Error	±0.002 g
Minimum Reading	0.001g
Output Interface	Rs232C
Pan Size	?90 mm
Power	220V+22V/-33V, 50Hz
Repeatability Error	0.001 g
Scale Interval	1 mg
Size	330×215×350 mm
Weighing Range	0 to 110 g
Weight	5.5 Kg
