Portable Ozone Generator TROG-606

Portable Ozone Generator TROG-606 is a practical and portable device. It can be used for various sterilization and cleaning processes. This applies to the use of air and water due to the operating principle of tube-type highvoltage discharge paths. It cangenerate O3 at a rate of 20 g / h. Moreover, it is equipped with stainless steel. It has good performance and long life.

Features:

It is having with good performance and long life

It is equipped with a stainless steel chamber

This applies to the use of air and water due to the operating principle of tube-type high voltage discharge paths

It has a lightweight and portable device

It cangenerate O3 ranges

It is having with an ozone concentration

Intended with a high voltage ionization

It is both industry and household type

It is an automatic control time type device

It is having with a cool wind of Byo

Specifications :

Application	Both can use air and water
O3 range	20 g/h
Overall size	500 ×160× 220 mm
Packing Size	550×220×270 mm
Power	220V/ 50HZ
